October 12, 2026

Dear Hiring Team,

I am writing to apply for an IT role in your company. I am interested in this opportunity because I have experience in technical support, equipment troubleshooting, installation, and maintenance.

In my previous work, I provided technical support and troubleshooting for various equipment, including large format industrial printers and other machines. I have experience diagnosing technical problems, performing repairs, installing equipment, and assisting customers with technical concerns.

Additionally, during the second half of 2026, I completed the TESDA's Enterprise-Based Education and Training (EBET) program for Computer Systems Servicing NC II at Technoblast Computer Trading. Through this training, I gained practical experience assembling and disassembling PC hardware, configuring Windows client and server environments, and setting up network configurations. I was able to pass the assessment for National Certificate Level II in CSS

I believe that my technical experience, problem-solving skills, and willingness to learn new technologies would allow me to contribute to your company. I would appreciate the opportunity to discuss my qualifications further in an interview.

Thank you for considering my application. I look forward to hearing from you.

Sincerely,
Diomar M. Luib
